

## Per-query outcome vs baseline 'bm25\_full\_corpus' (Recall@10)

metadata\_filter\_bm25f ★ winner

metadata\_bm25f

contextual\_bm25

bm25f

bm25\_v2tok

bm25\_original

improved  
tied  
harmed

0

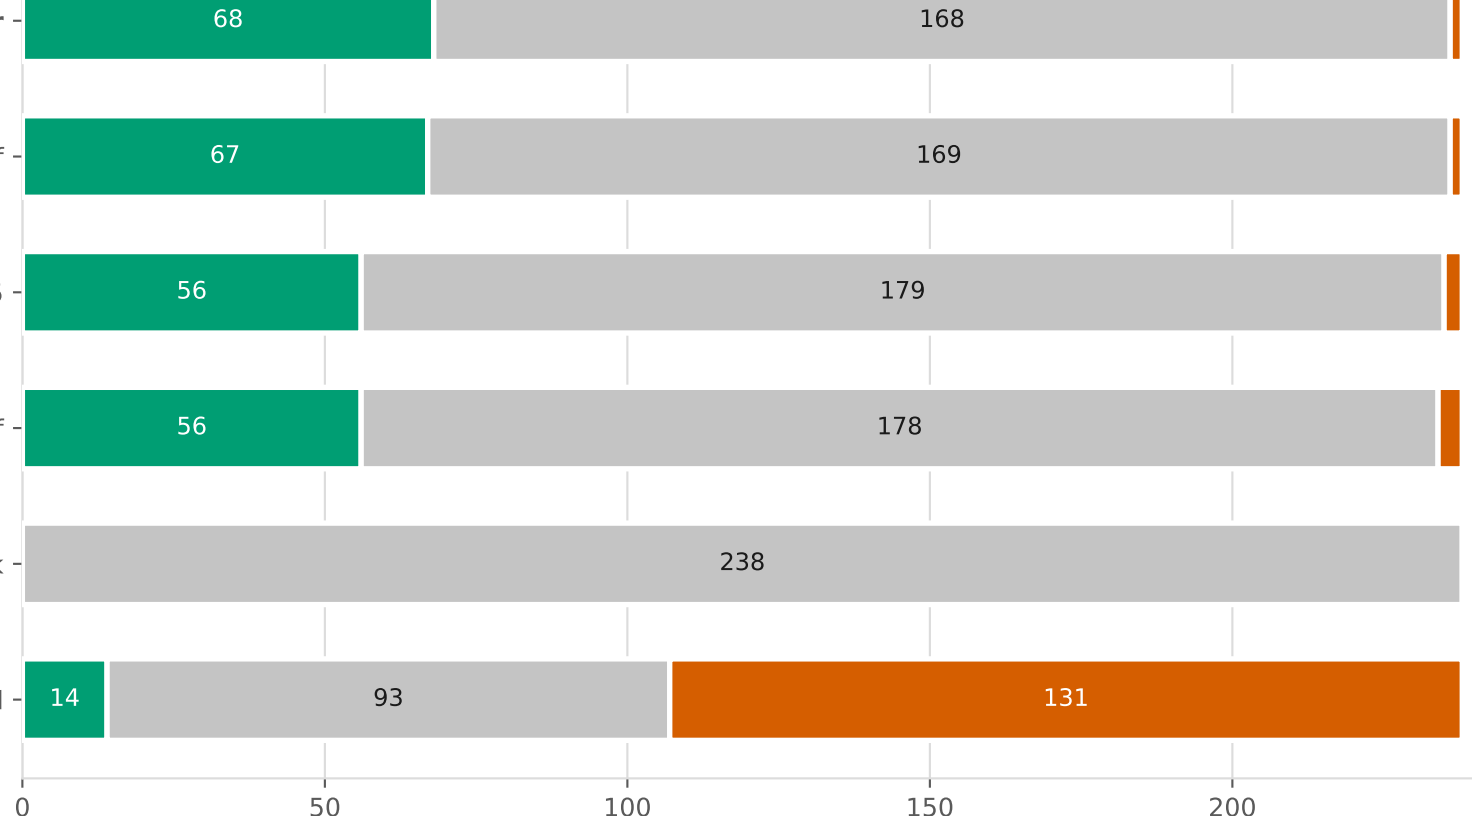

50

100

150

200

Number of benchmark queries (n = 238)

improved / harmed = the query's Recall@10 rose / fell against the baseline; tied = unchanged. The baseline itself has no bar (it is the reference).
